PROFESSIONAL SUMMARY

Computer Science and Technology undergraduate with hands-on experience building scalable, reliable web applications using React/Next.js, TypeScript, REST APIs, and object-oriented programming principles. Proven ability to deliver high-performance, reusable components and microservices across end-to-end projects. Experienced with Microsoft Azure, Docker, CI/CD pipelines, and Agile/Scrum methodologies. Keen interest in AI platforms and emerging technologies; passionate about applying sound engineering principles to build impactful digital enterprise solutions in collaborative, cross-functional environments.

EDUCATION

Bachelor of Technology — Computer Science and Technology, Dayananda Sagar University 2023 – Present
Bangalore, India

- CGPA: 8.92
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Full Stack Development, System Design Basics, Computer Network Fundamentals, Web Technologies & UI Development, DBMS

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C
Frontend: React.js, Next.js, Tailwind CSS, HTML5/CSS3, Angular, Vite, Figma (UI/UX), cross-browser compatibility, component-driven UI architecture
Backend: Node.js, Express.js, FastAPI, REST APIs, GraphQL
Databases: MySQL, MongoDB, Neo4J
Cloud & DevOps: Microsoft Azure, AWS, Docker, GitHub Actions CI/CD, Agile/Scrum methodologies
Security: OWASP Top 10, JWT auth, rate limiting, Zod validation, CORS, Helmet.js
Tools: Cursor, Claude Code, Copilot Studio, Git, Linux (Ubuntu)

PROJECTS

DineInGo — Restaurant & Event Reservation Platform 🌐 ,
Tech Stack: React, TypeScript, Tailwind CSS, Node.js, Express, MongoDB, Firebase

- Built cross-browser-compatible UI with modular, reusable components across 5+ distinct user flows; applied sound engineering principles to ensure scalability, availability, and product quality at scale
- Applied OWASP Top 10 security controls — JWT auth, rate limiting, Zod validation, Helmet.js, and strict CORS — while seeking feedback from stakeholders and proactively adopting new industry best practices to improve technical solutions throughout development

NEXORA - Sovereign Hybrid RAG for Air-Gapped Aerospace Intelligence 🌐 ,
Tech Stack: Python, FAISS, Neo4j, FastAPI, Ollama (LLaMA 3), REST APIs, RBAC

- Architected a fault-tolerant offline RAG system combining FAISS vector search and Neo4j graph database with full observability into retrieval pipeline performance; achieved sub-second query latency via MMR retrieval
- Implemented RBAC and structured data validation to enforce security and data integrity across air-gapped environments; rapidly adopted new AI tooling and frameworks to meet engineering benchmarks

Life Flow AI — Microsoft Imagine Cup 2026 🌐 , *Tech Stack: FastAPI, React.js, TypeScript, Microsoft Azure, Docker, GitHub Actions*

- Designed and developed a reusable, component-driven React workflow engine applying object-oriented engineering principles; optimized for performance, reliability, and observability across a distributed Microsoft Azure architecture
- Deployed containerized FastAPI microservices on Microsoft Azure with GitHub Actions CI/CD, reducing release cycle time by ~70%; maintained consistency in monitoring and operations across environments
- Coordinated cross-functional deliverables across a team of 4 using Agile/Scrum methodologies, demonstrating strong communication, time management, and collaborative problem-solving skills

CERTIFICATIONS & ACHIEVEMENTS

NASA Space Apps Challenge — Participant (2024 & 2025), NASA

Accenture Nordics — Software Engineering Job Simulation 🌐 , Accenture

Implement CI/CD Pipelines on Google Cloud — Skill Badge 🌐 , Google

AWS Academy Graduate — Cloud Foundations Training Badge 🌐 , AWS

MEAN Full Stack 🌐 , Simplilearn

Kaggle 5-Day AI Agents Intensive Course — Completion Badge 🌐 , Kaggle

DBT Fundamentals 🌐 , dbt Labs
